The C1140 K9W7-M service internal and external communities use this equipment for video streaming on their xbox 1 and 360. I believe that there's only one of these units and it is for the xbox community and they have an HDTV unit up and running on their S1140 K9W7-M service. A: I was on the same boat! I was trying to recover a spare Cisco router and it took me quite some time to realize the light weight version you mentioned cannot be converted. I had a same problem, you can view the IOS version here. There's a link that help you to know what's the difference between the two. Cisco IOS Software, C1140 Software (C1140-K9W7-M), Version 12.4(21a)JA1, RELEASE SOFTWARE (fc2) Cisco IOS Software, C1140 Software (C1140-K9W7-M), Version 12.4(21a)JA1, RELEASE SOFTWARE (fc4) Cisco IOS Software, C1140 Software (C1140-K9W7-M), Version 12.4(21a)JA1, RELEASE SOFTWARE (fc5) 1.3 MB/s Okay, this is only the IOS version. Cisco IOS Software, C1140 Software (C1140-K9W7-M), Version 12.4(21a)JA1, RELEASE SOFTWARE (fc2) Cisco IOS Software, C1140 Software (C1140-K9W7-M), Version 12.4(21a)JA1, RELEASE SOFTWARE (fc2) Cisco IOS Software, C1140 Software (C1140-K9W7-M), Version 12.4(21a)JA1, RELEASE SOFTWARE (fc2) 1.1 MB/s This is more like how it should work. Q: How to convert bit array to int array? There is: int [] a = {0,0,1,0,0,0,0,1,1,1,0,1,0,0,0,0,0,1,0,0}; BitSet b = new BitSet(); I want a and b to f678ea9f9e
